Niveau 1

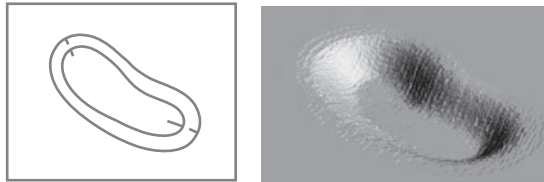

Les courbes de niveau

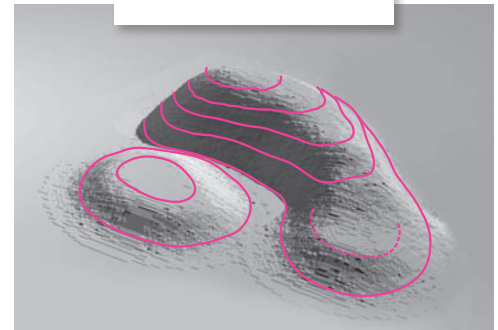

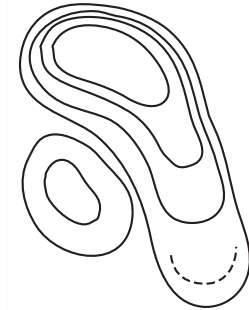

En course d'orientation, on a généralement 5 mètres entre chaque courbe, mais c'est à vérifier sur votre carte (**équidistance** de la carte).

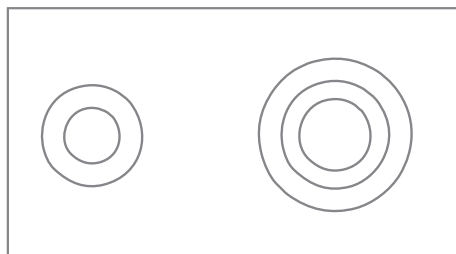

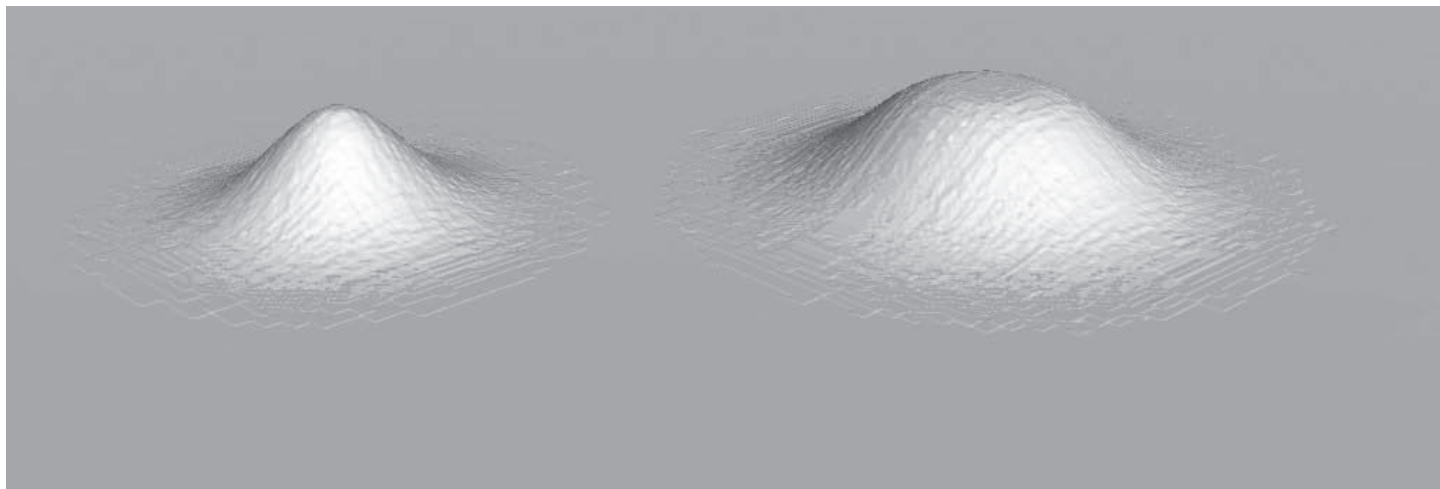

Les dépressions et rentrants sont indiqués par un tiret de pente

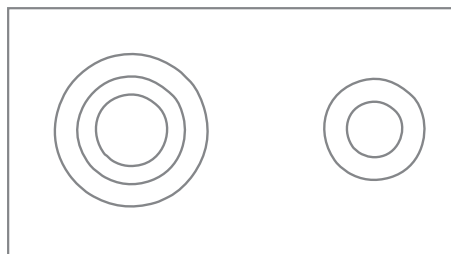

Si le cartographe juge qu'il y a un élément caractéristique à représenter à un **niveau intermédiaire** entre deux courbes (à 2,5 mètre pour une équidistance de 5 mètres), il l'indique par une **courbe en pointillé**.
